

Benefit of CI/CD

Made by
Amr Ibrahim

Agenda

- Fundamentals of CI/CD
- Benefits of CI/CD

Fundamentals of CI/CD

- Continuous integration: the practice of merging all developers working copies to a shared mainline several times a day
- All Development phases in CI include:

- Continuous Deployment: A software engineering approach in which the value is delivered frequently through automated deployments. Everything related to deploying the artifact fits here
- CD phases include:

Benefit of CI/CD

- We can divide benefit of CI/CD into four parts
- Below table include the details

Reduce
cost

Avoid Cost

Increase
revenue

Protect
revenue

Technical Language	Value	Translation
Catch Compile Errors After Merge	Reduce Cost	Less developer time on issues from new developer code
Catch Unit Test Failures	Avoid Cost	Less bugs in production and less time in testing
Detect Security Vulnerabilities	Avoid Cost	Prevent embarrassing or costly security holes
Automate Infrastructure Creation	Avoid Cost	Less human error, Faster deployments
Automate Infrastructure Cleanup	Reduce Cost	Less infrastructure costs from unused resources

Cont. Benefit of CI/CD

- Below table include the details

Technical Language	Value	Translation
Faster and More Frequent Production Deployments	Increase Revenue	New value-generating features released more quickly
Deploy to Production Without Manual Checks	Increase Revenue	Less time to market
Automated Smoke Tests	Protect Revenue	Reduced downtime from a deploy-related crash or major bug
Automated Rollback Triggered by Job Failure	Protect Revenue	Quick undo to return production to working state

Thanks
